Our Vision

To deliver a person centred, high standard and consistent clinical pharmacy service across the South West, supporting the provision of optimal care at a time when demand is ever increasing.

Our Aims

- The development of a resilient, highly trained pharmacy team to include pharmacist prescribers.
- To support the management of patients with long term conditions, optimising therapy to achieve the best outcomes for both the patient and health economy.
- Ensuring the appropriate clinical management of patients in care homes rationalising polypharmacy and identifying (and treating where appropriate) the deteriorating patient in this vulnerable cohort.
- Developing 'in practice' robust medicines governance processes ensuring safe, efficient and effective prescribing.
- To identify, implement and review cost-effective changes to prescriptions and reduce the wastage of medication.
- Integrating pharmacists into primary and urgent care services to ensure access for all to experts in medicine.
