

The Team

We have a multi disciplinary team approach to our care. Our team is made up of various healthcare professionals skilled in the care and treatment of individuals with dementia. These professionals include Consultant Psychiatrists, Nurses, Healthcare Assistants, Occupational Therapists, Physiotherapists and Clinical Psychologists.

We are also able to refer patients for other services including Speech and Language, Dieticians, and Social Workers.

Everybody's experience of an illness is different. Our professional, multi-disciplinary team provides personalised care based on a thorough and continuous assessment of each person's specific needs as part of the Dementia Pathway.

OUR WARD ENVIRONMENT

Our ward consists of 10 single bedrooms.

We also have sensory room and a garden area which patients can retreat to away from the main communal areas.

Our Occupational Therapy team run a variety of activities throughout the day for all patients to participate in. These include knitting, arts and crafts, baking and sporting games.

Relatives, Friends and Carers

We provide advice and support to all family, friends and carers of our patients.

We offer a drop in session on the last Wednesday of the month. This is an opportunity for you to express any concerns, or have any questions answered by our Occupational Therapist and care team.

Please ask a member of the team for further information.

About Us

Edgcumbe Unit offers a homely, safe and secure environment for people at the most vulnerable stages of dementia or cognitive impairment.

Our philosophy is that everybody's journey through illness is individual. The ward recognises this and care is planned accordingly on an individual basis. We provide skilled care and treatment for patients whilst assessing their current skills and abilities, and identifying possible future care needs.

We encourage relatives, friends and carers to be fully involved in care planning and decision making.
